

# Garlock®

an EnPro Industries family of companies

February 19, 2016

Our customer commitment

## A tradition of innovation and quality

- We deliver the most innovative sealing solutions and unique services to the world's processing industries.
- For over a century, Garlock has been collaborating and assisting its customers to efficiently seal their toughest process medias in demanding applications.
- We have been developing products in close collaboration with our customers for over 125 years.

## Global leader in fluid sealing technology

- Garlock has 23 global operations employing 1,700 people.
- Garlock supports a network of authorized distributors in over 90 countries.
- Garlock offers a wide range of high-performance sealing solutions for companies in leading industrial fields.
- Garlock is a part of EnPro Industries Inc.

R&D facilities

## Product development with our customers

At Garlock we develop products in close and intensive collaboration with our customers.

The Garlock research and development facilities enjoy a high reputation. In addition we have close relationships with renowned institutes and universities.

Non-disclosure agreements and contracts guarantee our customers the exclusive use of jointly developed solutions.

## Trainings

Against the background of legal and regulatory requirements for plant operators increasingly innovative and technically advanced sealing systems are required with a wide range of applications from the user side.

In terms of storage, handling and assembly of these sealing systems is therefore competent staff at the user side of increasing importance. To meet these demands Garlock offers a variety of training courses that are tailored to the end user. In the engineering field, we regularly organize seminars to inform about the latest developments in the field of sealing technology. Trainings are also offered in the field of mechanics ("correct installation of seals").

## Solutions for the engineering and construction

Safe and trouble-free process flows must be guaranteed in plant construction.

Garlock seals ensure reliable sealing of critical junctions in flange connections, valves, heat exchangers, pressure vessels, and pumps.

Garlock seals are the No. 1 choice when it comes to handling critical and aggressive media.
